

Advisors: Mani Mina, John Pritchard **Client:** Minnetronix

Members (roles): Brandon McDonnell (Group Lead); Justin Long (Web Master), Timothy Dee (Key Concepts)

Project: Remotely Connected Electric Field Generator for Particle Separation in a Fluid

Weekly Summary

Final week of the project and we are done working in terms of what we will accomplish on the actual project. This week we finalized our presentation and design documents, wrapped up the PCB design, and plan to send all deliverables to the customer upon completing our presentation on Wednesday.

Weekly Notes

Spent time on final report and presentation and practiced the presentation for Wednesday

Updated website with current documents to show the current state of our project

Plans For Next Week

This is the final week of our project
