**Project:** Remotely Connected Electric Field Generator for Particle Separation in a Fluid

---

## Weekly Summary

This week we spent time working on the documents for the final presentation and various other design documents. We did not work as much this week because Spring break started and we were away from Ames.

## Weekly Notes

Design documents worked on as well as final presentation

## Pending Issues

Minigen weird output issue

Multi-stage amplifier still has issues

## Plans For Next Week

Spring break no meeting

## Individual Contributions

Brandon McDonnell 5hrs

Tim Dee 5hrs

Justin Long 5hrs

## Total Contributions

92hrs

107hrs

86hrs
